

CUSTOM SPRAYING POLICY

- 1.** Heartland Cooperative Services is responsible for following all manufacturer's label directions for mixing, loading, and applying. The spraying will be done by our licensed and trained personnel.
- 2.** Any unusual conditions during application will be communicated to the grower. We will respond to the report of a potential problem within **48 hours** of notification. If necessary, we will inspect the field and make a recommendation to correct the specific problem. Any problems reported beyond **30 days** of application will not be considered.
- 3. Chemical performance is not guaranteed.** Heartland Co-op will report any weed control or yield problems to our suppliers. We will work with the grower and supplier to resolve any issue that may occur.
- 4.** The growth stage of the crop being sprayed must be within stated limits. If a situation occurs that pushes label recommendations, Heartland Co-op personnel will discuss all options with the grower.
- 5.** Heartland Co-op will not take responsibility for problems not covered by the product label, customer negligence, or acts of God.
- 6.** Complete product labels are available upon request. Or at the following website (<http://www.cdms.net>)
