Grain Handling Stand-Down

A center grain unloading auger draws grain from the top center and the grain forms a cone as the bin is emptied. Illustration: John A. Kramer, Safety Measures in Handling Stored Grain, Kansas State University, February 1989. Illustration: John A. Kramer, Safety Measures in Handling Stored Grain, Kansas State University.

Upcoming Events

Grain Elevator and Processing Society (GEAPS) will sponsor a grain safety webinar – January 26, 2017 @2pm CST (Link will be available on their website)

- OSHA Grain Handling Safety Stand-Down webinar will be hosted by GEAPS and will cover hazard awareness and precautions for grain engulfment and entrapment. The webinar speakers will cover the latest statistics and trends in engulfment and entrapment causes, incidents, and risks. The webinar will also describe the stand-down and the desired outcomes.

GEAPS Exchange 2017 in Kansas City, KS - February 25-28, 2017

- Exchange 2016 in Austin drew 2,852 attendees from 28 countries, and set records with 412 exhibitors in 250,000 square feet of exhibit space. The conference also had a record 41.5 hours of educational programming. GEAPS is hard at work planning another outstanding conference for GEAPS Exchange 2017 in Kansas City, Feb. 25-28, 2017.

OSHA Grain Handling Safety Stand-Down - March 27-31, 2017

- OSHA Grain Handling Safety Stand-Down will be in collaborating with OSHA, GEAPS and University of Texas Arlington (UTA) to bring awareness to hazards associated with engulfment and entrapments.
